Compliance of AGLAE's tests with approvals

A.G.L.A.E. is concerned with the compliance of its tests regarding:

- the **approval delivered by the Ministry in charge of Health issues** to carry out sampling and analyses intended for water quality control (French Order of 30 December 2022).

- the **approval delivered by the Ministry in charge of Environmental issues** to carry out analyses in the field of water and aquatic medium (French Order of 26 June 2023, completed by the current notice on the limits of quantification for 'parameter-matrix' pairs).

In particular, in order to meet these requirements, **at least one test per scheme for the relevant « parameters-matrices » concerned by this Order, will have a concentration less than 15 times the set quantification limit** when it is possible to maintain at the same time the quality of the test.

Which tests should you register for to meet French approvals' requirements?

Check the documents relating to the conformity of our tests of your member area on www.association-aglae.fr.

From the **French home page**, select « Téléchargements / Conformité réglementation »:

For non-members, these documents can be sent on request.

New in 2024 - environmental and cosmetics fields

New programmes in the catalogue

Solid matrices

- ✓ 47 Grain size distribution in solid matrices (*sediments and soils*)
- ✓ 51B Chemical analyses and metals in waste (leaching) - 'LAGA/DEPV' (conducted every two years)

Metals in waters

- ✓ 3G Additional metals in fresh waters

Base parameters and indicators in waters

- ✓ 2G Dry residue in waste waters

Organic pollutants

- ✓ 5E Chelating agents in fresh waters
- ✓ 59B AOF in waste waters

Cosmetics

- ✓ 111 Aerobic mesophilic bacteria and yeast/mould in cosmetics
- ✓ 112 Specified microorganisms in cosmetics

Water for medical use

- ✓ 86A Non-tuberculous mycobacteria in waters for medical use

Sampling and *in situ* measurements

- ✓ 101D Sampling using automatic sampler in treatment plant - Creuse

Modifications of programmes

(introduced in programmes existing in 2023)

Base parameters and indicators in waters

- ✓ 1A and 1Ab: colour and turbidity removed and added to the programme 1D
- ✓ 1A and 1Ab: REDOX potential removed
- ✓ 1H: permanganate index added

Waste

- ✓ 51: Cr⁺⁶ and Hg removed
- ✓ 9: grain size distribution removed but creation of a specific programme 47 with grain size analysis in sediment and soil

Organic micropollutants in waste waters

- ✓ 24C: alpha-HBCDD, beta-HBCDD and gamma-HBCDD removed in waste waters

Perfluorinated compounds

- ✓ 59: sum of the 20 PFAS added in fresh waters
- ✓ 59A: 15 PFAS added in waste waters to comply with French regulation on emissions from industrial activities likely to release these substances

Pharmaceuticals in fresh waters

- ✓ 57: 17-beta-estradiol added

Specific points

Alternative methods in environmental microbiology

- ✓ In addition to the assessment all methods together, an assessment per methodological group will be systematically carried out for programmes 11, 30, 31 and 32.

Solid matrices (sediments, sludge, soil, waste)

 The quantity of materials is limited. Therefore, registrations are possible within the limits of available samples.

46: VOCs provided in **soil** in 2024

In general, if you have access to polluted solid matrices (particularly waste), please contact us at contact@association-aglae.fr

Due to technical constraints linked to the supply of contaminated waste:

- ✓ **51 Chemical analyses and metals in waste (leaching):** design of the test modified with 1 measurement per parameter and per bottle.
- ✓ **51C PAHs in bituminous waste:** test conducted every two years as mentioned in the 2023 catalogue. It is not provided in 2024 but will be in 2025.

Programmes removed

Due to a lack of participants, we have decided not to provide the following programmes:

- ✓ 94 PAHs and organochlorine pesticides in sparkling waters
- ✓ 120 Solid Fuel Products

Conduct of the programmes subject to a sufficient number of participants

English version of the test documents provided for almost all the tests

In red: modifications compared to the 2023 scheme

*** In which tests are provided the various organic micropollutants?**

A document enables you to search by name and/or CAS code and find out in which programme(s) and matrix(es) they are provided.

This index is available in your Members Area, in the "Downloads / Catalogues" section.

Participate in AGLAE's External Quality Control

A WAY OF WORKING THAT PROVIDES YOU WITH THE HIGHEST STANDARD OF RESULTS WITH CONFIDENTIALITY AND IMPARTIALITY

Each step of the way, AGLAE is there supporting you.

REGISTRATIONS FOR PROFICIENCY TESTING ARE DONE KNOWING THE WHOLE PROCESS, WITH A DETAILED AND RIGOROUS SCHEDULE

- ✓ The number of evaluations per year for each parameter is specified in the catalogue, concentration levels and stabilisation are available on request.
- ✓ AGLAE uses "express" shipments for your samples and makes sure of their distribution to your laboratory.
- ✓ A sufficient delay to analyse and the report the results.
- ✓ Via your member area, **enter your results and find instructions, assigned codes, reports, summaries of your results, certificate of participation...**

THE OPTIMISATION OF RISK MANAGEMENT FOR YOUR LABORATORY

You have a better visibility of potential anomalies through:

- ✓ An appropriate test design (duplicate samples, repeated measurements),
- ✓ A large number of participants: around 200 laboratories in the field of 'base' microbiology and 'base' physico-chemical analyses.

AGLAE's detailed study:

- ✓ Influence of the analytical methods, manufacturers (equipment and consumables)... factors that we study to help you improve the quality of your analyses,
- ✓ For waters intended for medical use and water microbiology, estimation of your own uncertainties in microbiology,
- ✓ Check of your uncertainty estimates in chemistry (zeta-score),
- ✓ A report validated by experts of the field and personalised for most tests.

ATTRACTIVE DISCOUNTS, PAYMENT CONDITIONS MADE EASIER

- Choose among the various programmes and benefit from discounts up to 15%,
- A possible payment in 2 or 3 folds depending on the amount your participation.
- Payment possible by cheque (in €), bank transfer, credit card on <https://www.helloasso.com/associations/a-g-l-a-e/paiements/aglae>

Amount of your invoice (excluding transport cost)	Discount
3000 ≤ Amount < 6000 € excl. VAT	5%
6000 ≤ Amount < 9000 € excl. VAT	10%
Amount ≥ 9000 € excl. VAT	15%

Additional services

ADDITIONAL TEST SAMPLES TO TEST ANOTHER METHOD, EVALUATE A TECHNICIAN

- ✓ Test samples available for almost all the tests at half price.
- ✓ Besides your usual distribution, you receive one (or several) additional parcel(s).
- ✓ The results of these samples are not statistically processed by AGLAE but for most tests you get a sheet **in your results file** where to **calculate your z-score**. Note that this sheet can also be used in case of unit error, incorrect results' report, etc.

⇒ Check the **list of samples and their price on your Member Area** (Downloads / Catalogues) and contact us to receive a quote. These additional samples need to be ordered after you registration for the test and before the shipment.

QUALITY CONTROL MATERIALS FOR YOUR MONITORING AND IMPROVEMENT OF YOUR ANALYTICAL PERFORMANCE

- ✓ Materials coming from the **solid matrices tests: sediments, sludge, polluted sites and soils**.
- ✓ Purchased at any time during the year and delivered with a certificate presenting the precision values obtained during the test (assigned value and uncertainties).

⇒ Check the **list of materials, prices and available quantities on your Member Area** (Downloads / Catalogues) and contact us to receive a quote.

TRAINING SESSIONS IN MICROBIOLOGY: ONE TOPIC POSSIBLY PROVIDED IN ENGLISH

Two-day on-line session to become operational for:

- ✓ Characterising a microbiological method according to ISO 13843 in order to validate it
- ⇒ Should you be interested in such a session, please get back to us.

CUSTOMIZED SERVICE: 'PERFORMANCE CHARACTERISTICS OF MICROBIOLOGICAL METHODS'

Do you need to characterise specific methods?

AGLAE can provide you support to establish methods performance characteristics, in conformity with ISO 13843*. Benefit from AGLAE's technical and statistical experience to validate your microbiological method.

* *Water quality — Requirements for establishing performance characteristics of quantitative microbiological methods*

⇒ Should you have such needs, contact us to study your request together and issue a quote.

SUMMARY OF YOUR RESULTS FOR WATER MICROBIOLOGY AND WATER FOR MEDICAL USE TESTS

Gather at any time your results and performance: for a selected period, your results are grouped in an Excel file; this is a tool to support you in your Internal Quality Control, your audits...

Programmes' description

Content

For each programme's description, you will find the technical content of the test : volumes, parameters, matrices, dispatch month...

The concentration levels and stabilisation modalities of the samples are available on request.

The samples' dispatch months are given for information only.

Transport costs depend on the destination and tests selected within the programmes; contact us to get a quote.

Our aim is to prepare materials as close as possible to the samples analysed in routine: the contamination levels can therefore be very low or very high.

➔ **Our concentration levels are available on request.**

SAMPLING AND *IN SITU* MEASUREMENTS

PROGRAMMES 100A AND 100C: *IN SITU* MEASUREMENTS AND SAMPLING IN DIFFERENT TYPES OF WATER

€ 809 excl. VAT – price for the report of one series of results

From 8 participants per interlaboratory comparison in 2024 - EXPERIENCE: 7 YEARS

- 2 possible locations in France:
 - ✓ 24M100A.1 - Nord – April/May 2024
 - ✓ 24M100C.1 – Rhône - June 2024

- Possibility to combine the programmes:
 - ✓ 101A and 100A
 - ✓ 101C and 100C
- *In situ* measurements:
 - ✓ In several types of water:
Nord: bathing water, river water and swimming pool water
Rhône: bathing water, river water
 - ✓ Parameters for bathing waters and river waters*: pH, conductivity at 25°C, dissolved oxygen, turbidity, temperature, Secchi disc transparency, REDOX potential. Other parameters may be provided depending on the locations.
 - ✓ Parameters for swimming pool waters: pH, temperature, free chlorine and total chlorine.
- Sampling of surface water and/or bathing water:
 - ✓ Analyses by a third party: microbiological parameters* (intestinal enterococci, *E. coli*, ...) and/or chemical* (suspended matters, nitrates, organic carbon, total phosphorus, total calcium, micropollutants potentially present...)

* This list will be adapted according to the characteristics of the waters of the selected locations.

PARTICULARITIES

- ✓ Come with the usual sampling equipment
- ✓ Test conducted for a minimum of 8 participants per location, limited number of places
- ✓ Exact dates and addresses communicated at a later stage
- ✓ **Test documents of these Proficiency Testing Schemes are not translated into English.**

PROGRAMMES 101A AND 101C : SAMPLING USING AUTOMATIC SAMPLERS IN TREATMENT PLANT

€ 809 excl. VAT - price for the report of one series of results

From 8 participants per interlaboratory comparison in 2024 -
EXPERIENCE: 5 YEARS

➤ 2 possible locations in France:

- ✓ 24M101A.1- Nord – April/May 2024
- ✓ 24M101C.1 - Rhône – June 2024

➤ Possibility to combine the programmes:

- ✓ 101A and 100A
- ✓ 101C and 100C

➤ Measurements on reconstituted sample, on-site:

Parameters*: pH, conductivity, dissolved oxygen, turbidity. Other parameters may be provided.

➤ In situ measurements:

Parameter: temperature.

➤ Sampling:

Analyses by a third party: chemical parameters* (suspended matters, ST-CDO, ammonium, Total Organic Carbon, micropollutants potentially present...)

➤ **New in 2024**: evaluation of the total volume flowed over 24 hours.

** This list will be adapted according to the characteristics of the waste waters.*

- ✓ Test conducted for a minimum of 8 participants. Limited number of places
- ✓ Exact dates and addresses communicated at a later stage
- ✓ **Test documents of these Proficiency Testing Schemes are not translated into English.**

PROGRAMME 100D: *IN SITU* MEASUREMENTS AND SAMPLING IN DIFFERENT TYPES OF WATER - CREUSE

€ 809 excl. VAT - price for the report of one series of results

From 8 participants per interlaboratory comparison in 2024 – EXPERIENCE: 7 YEARS

- **24M100D.1 - Creuse - October 2024**
- ***In situ* measurements:**
 - ✓ **In several types of water:** bathing water, river water and swimming pool water.
 - ✓ **Parameters for bathing waters and river waters*:** pH, conductivity at 25°C, dissolved oxygen, turbidity, temperature, Secchi disc transparency, REDOX potential. Other parameters may be provided depending on the location.
 - ✓ **Parameters for swimming pool waters*:** pH, temperature, free chlorine, total chlorine and isocyanuric acid.
- **Sampling of surface water:**
 - ✓ **Analyses by a third party: microbiological parameters*** (intestinal enterococci, *E. coli*, ...) **and chemical*** (suspended matters, nitrates, organic carbon, total phosphorus, total calcium, ...)

** This list will be adapted according to the characteristics of the waters of the selected places.*

PARTICULARITIES

In partnership with:

- ✓ **Possibility to combine the programmes:** 100D - 101D - 102D
- ✓ Come with the usual sampling equipment
- ✓ Minimum of 8 participants per test, limited number of participants
- ✓ Exact dates and address communicated at a later stage
- ✓ **Test documents of these Proficiency Testing Schemes are not translated into English.**

PROGRAMME 101D: SAMPLING USING AUTOMATIC SAMPLERS IN TREATMENT PLANT - CREUSE

€ 809 excl. VAT - price for the report of one series of results

From 8 participants per interlaboratory comparison in 2024 –
EXPERIENCE: 7 YEARS

➤ 24M101A.1 - Creuse (France) – October 2024

➤ Measurements on reconstituted sample, on-site:

Parameters*: pH, conductivity, dissolved O₂, turbidity. Other parameters may be provided.

➤ In situ measurements:

Parameter: temperature

➤ Sampling:

Analyses by a third party: chemical parameters* (suspended matters, ST-DCO, ammonium, Total Organic Carbon, nitrates, micropollutants potentially present, ...)

** This list will be adapted according to the characteristics of the waste waters.*

24M1B.1 - Natural water - sent in April 2024 - Refrigerated parcel			
Chemical Oxygen Demand, Chemical Oxygen Demand (Sealed Tube method), DOC, total organic carbon (TOC), Total bound nitrogen (TN _b measured), Total Kjeldahl Nitrogen (TKN), Total-P	1000 mL	2	2
biochemical oxygen demand after 5 days	1000 mL	2	1
total suspended solids (TSS)	1000 mL	2	2
24M1B.2 - Natural water - sent in September 2024 - Refrigerated parcel			
Chemical Oxygen Demand, Chemical Oxygen Demand (Sealed Tube method), DOC, total organic carbon (TOC), Total bound nitrogen (TN _b measured), Total Kjeldahl Nitrogen (TKN), Total-P	1000 mL	2	2
biochemical oxygen demand after 5 days	1000 mL	2	1
total suspended solids (TSS)	1000 mL	2	2

Recommended period to start the sample treatment (PRDT):

time interval during which the quality of test materials is optimal (in number of days)

biochemical oxygen demand after 5 days, total suspended solids (TSS)	D ₀ +1
Chemical Oxygen Demand, Chemical Oxygen Demand (Sealed Tube method)	D ₀ +2
DOC, total organic carbon (TOC)	D ₀ +3
Total Kjeldahl Nitrogen (TKN)	D ₀ +6
Total bound nitrogen (TN _b measured), Total-P	D ₀ +10

24M1C.1 - Natural water - sent in June 2024 - Refrigerated parcel			
chlorophyll a, pheopigments index	2000 mL	2	2
24M1C.2 - Natural water - sent in September 2024 - Refrigerated parcel			
chlorophyll a, pheopigments index	2000 mL	2	2

PARTICULARITIES

Chlorophyll a and pheopigments index: after extraction, measurement of the absorption by molecular absorption spectrometry then calculation of the concentrations using the LORENZEN or the SCOR-UNESCO equation.

Recommended period to start the sample treatment (PRDT):

time interval during which the quality of test materials is optimal (in number of days)

chlorophyll a, pheopigments index

colour by comparison with hexachloroplatinate, colour using (NF EN) ISO 7887 method B, turbidity

Parameters to analyse	Bottle		Number of measurements per parameter and per bottle
	Volume	Number	
24M1D.1 - sent in February 2024 - Refrigerated parcel			
Clean water			
conductivity, free chlorine (or available chlorine), isocyanuric acid, pH, REDOX potential, total chlorine	500 mL	2	2
colour by comparison with hexachloroplatinate, colour using (NF EN) ISO 7887 method B, pH	250 mL	2	2
turbidity	100 mL	2	2
24M1D.2 - Clean water - sent in September 2024 - Refrigerated parcel			
Clean water			
conductivity, free chlorine (or available chlorine), isocyanuric acid, pH, REDOX potential, total chlorine	500 mL	2	2
Natural water			
colour by comparison with hexachloroplatinate, colour using (NF EN) ISO 7887 method B, pH	500 mL	2	2
turbidity	500 mL	2	2

PARTICULARITIES

Colour by comparison with hexachloroplatinate: The colour can be determined by visual comparison according to (NF EN) ISO 7887 - method D or by spectrophotometry according to (NF EN) ISO 7887 - method C. For clean water (clear water), the samples should not be filtered.

Colour using (NF EN) ISO 7887 method B: The colour determination according to (NF EN) ISO 7887 method B can be carried out on these samples. For clean water (clear water), the samples should not be filtered.

Other recommended proficiency tests:

🔗 **Programmes 100** 'In situ measurements and sampling in different types of waters' in several regions of Metropolitan France to evaluate the quality of your on-site sampling (conducted in French only)

🔗 **Programme 1E** 'Dissolved oxygen in fresh waters'

Recommended period to start the sample treatment (PRDT):

PARTICULARITIES

Other recommended proficiency tests:

- ↳ Programme 2C 'Indicators in waste waters at low concentration levels'
- ↳ Programme 2F 'ST-COD at low contents in waste waters'

Recommended period to start the sample treatment (PRDT):

time interval during which the quality of test materials is optimal (in number of days)

BOD ₅ , Chemical Oxygen Demand, Chemical Oxygen Demand (Sealed Tube method), pH, total suspended solids (TSS)	D ₀ +1
DOC, total organic carbon (TOC), NH ₄ ⁺ , NO ₂ ⁻ , NO ₃ ⁻ , Total Kjeldahl Nitrogen (TKN), Total bound nitrogen (TN _b measured), conductivity	D ₀ +3
Br ⁻ , Cl ⁻ , Total-P	D ₀ +10

D₀: Day the samples are sent to all the participants (for most proficiency tests, Tuesday)

PROGRAMME 2C: INDICATORS IN WASTE WATERS AT LOW CONCENTRATION LEVELS

€ 142 excl. VAT - total amount for 1 test (excluding transport costs)

134 participants in 2023 - EXPERIENCE > 25 YEARS

Need to test another method, evaluate your staff?

Order **additional test samples** (parcel in its entirety): € 75 excl. VAT (excluding transport costs)

PROGRAMME 2D: FIELD PARAMETERS IN WASTE WATERS

€ 87 excl. VAT - total amount for 2 tests (excluding transport costs)

108 participants in 2023 - EXPERIENCE > 5 YEARS

Need to test another method, evaluate your staff?

Order **additional test samples** (parcel in its entirety): € 25 excl. VAT (excluding transport costs)

Parameters to analyse	Bottle		Number of measurements per parameter and per bottle
	Volume	Number	
24M2D.1 - Waste water - sent in March 2024 - Refrigerated parcel			
pH, conductivity, turbidity, REDOX potential, true colour by comparison with hexachloroplatinate	500 mL	2	2
24M2D.2 - Waste water - sent in October 2024 - Refrigerated parcel			
pH, conductivity, turbidity, REDOX potential, true colour by comparison with hexachloroplatinate	500 mL	2	2

PARTICULARITIES

True colour analysed by spectrophotometry according to method C of the NF EN ISO 7887 standard. The determination of the true colour according to the method D of the NF EN ISO 7887 standard can be carried out.

Pour aller plus loin, nous vous conseillons :

🔧 **Programmes 101** 'Sampling using automatic samplers in treatment plant' in several regions of Metropolitan France to evaluate the quality of your on-site sampling (conducted in French only)

Recommended period to start the sample treatment (PRDT):

time interval during which the quality of test materials is optimal (in number of days)

pH, true colour by comparison with hexachloroplatinate	D ₀ +1
REDOX potential, turbidity	D ₀ +2
conductivity	D ₀ +3

PROGRAMME 2F: ST-COD AT LOW CONTENTS IN WASTE WATERS

€ 95 excl. VAT - total amount for 1 test (excluding transport costs)

68 participants in 2023 – EXPERIENCE: 2 YEARS

Need to test another method, evaluate your staff?

Order **additional test samples** (parcel in its entirety): € 50 excl. VAT (excluding transport costs)

Parameters to analyse	Bottle		Number of measurements per parameter and per bottle
	Volume	Number	
24M2F.1 - Waste water - sent in June 2024 - Refrigerated parcel			
Cl ⁻ , Chemical Oxygen Demand (Sealed Tube method)	250 mL	2	2

PARTICULARITIES

In the frame of this proficiency test, ST-COD contents will be low and between 10 mg of O₂/L and 30 mg of O₂/L.

Test samples may contain high chloride contents, which will nevertheless be representative of the levels found in routine waste waters.

Recommended period to start the sample treatment (PRDT):

time interval during which the quality of test materials is optimal (in number of days)

Chemical Oxygen Demand (Sealed Tube method)	D ₀ +1
Cl ⁻	D ₀ +10

D₀: Day the samples are sent to all the participants (for most proficiency tests, Tuesday)

PROGRAMME 2G: DRY RESIDUE IN WASTE WATERS

24M5C.4 - Waste water - sent in December 2024 - Refrigerated parcel			
total hydrocarbons index - C10-C40 range	1000 mL	2	1

PARTICULARITIES

Total hydrocarbons index - C10-C40 range according to (NF EN) ISO 9377-2 or equivalent standard.

Total hydrocarbons index - C10-C40 range: sum of the concentrations of compounds extractable with a hydrocarbon solvent, boiling point between 36 °C and 69 °C, not adsorbed on Florisil and which may be chromatographed by GC-FID, with retention times between those of n-decane (C10H22) and n-tetracontane (C40H82).

Recommended period to start the sample treatment (PRDT):

time interval during which the quality of test materials is optimal (in number of days)

total hydrocarbons index - C10-C40 range	D ₀ +10

PROGRAMME 5D: VOLATILE HYDROCARBONS INDEX IN WATERS

€ 172 excl. VAT - total amount for 3 tests (excluding transport costs)

29 participants in 2023 - EXPERIENCE > 5 YEARS

Need to test another method, evaluate your staff?

Order **additional test samples** (parcel in its entirety): € 30 excl. VAT (excluding transport costs)

Parameters to analyse	Bottle		Number of measurements per parameter and per bottle
	Volume	Number	
24M5D.1 - Waste water - sent in February 2024 - Refrigerated parcel			
Volatile hydrocarbons index – C5-C9 range	100 mL	2	1
24M5D.2 - Natural water - sent in June 2024 - Refrigerated parcel			
Volatile hydrocarbons index – C5-C9 range	100 mL	2	1
24M5D.3 - Waste water - sent in August 2024 - Refrigerated parcel			
Volatile hydrocarbons index – C5-C9 range	100 mL	2	1

PARTICULARITIES

Volatile hydrocarbons index – C5-C9 range according to NF T90-124 or equivalent standard.

Volatile hydrocarbons index – C5-C9 range: sum of concentrations of compounds present in the static headspace giving a response in gas chromatography equipped with a nonpolar column and a flame ionization detector (GC/FID), in experimental conditions enabling to obtain a C5/123-TMB ratio between 0,7 and 1,3, and with retention times between those of pentane (C₅H₁₂) and 1,2,3-trimethylbenzene (C₉H₁₂).

Recommended period to start the sample treatment (PRDT):
time interval during which the quality of test materials is optimal (in number of days)

Volatile hydrocarbons index – C5-C9 range	D ₀ +3

Hexachlorobutadiene nitro-aromatics: 1-chloro-2-nitrobenzene, 1-chloro-3-nitrobenzene, 1-chloro-4-nitrobenzene, 2,4-dinitrotoluene, 2,6-dinitrotoluene, 2-nitrotoluene, nitrobenzene, chlorobenzenes: 1,2,4,5-tetrachlorobenzene, tetrachlorobenzenes (sum of the 3 isomers), 1,2,3-trichlorobenzene, 1,2,4-trichlorobenzene, 1,3,5-trichlorobenzene, trichlorobenzenes (sum of the 3 isomers), hexachlorobenzene, pentachlorobenzene	1000 mL	2	1
[1] parameter not covered by accreditation (see general conditions of registration)			

PARTICULARITIES

Other recommended proficiency tests:

- 🔗 **Programme 4Cb** 'Volatile organohalogenes and benzene derivatives in fresh waters at low concentration levels - **'Environmental approval'** to meet the requirements of French legislation (contact us for the concentration ranges).
- 🔗 **Programme 92** 'BTEX and VOC in atypical and non-atypical natural mineral waters - **'Health approval'**

Recommended period to start the sample treatment (PRDT): time interval during which the quality of test materials is optimal (in number of days)	
nitro-aromatics	analyse upon receipt
chlorobenzenes	D ₀ +3
hexachlorobutadiene	D ₀ +3
BTEX VOHs chlorobenzenes - light chlorotoluenes	D ₀ +3

D₀: Day the samples are sent to all the participants (for most proficiency tests, Tuesday)

PROGRAMME 4Cb: VOLATILE ORGANOHALOGENS AND BENZENE DERIVATIVES IN FRESH WATERS AT LOW CONCENTRATION LEVELS

The materials are suitable for the check of public drinking waters, spring waters and non-atypical natural mineral waters except for BTEX and VOHs provided in non-atypical mineral waters of programme 92.

€ 333 excl. VAT - total amount for 1 test (excluding transport costs)

61 participants in 2023 - EXPERIENCE > 25 YEARS

Need to test another method, evaluate your staff?

Order **additional test samples** (parcel in its entirety): € 170 excl. VAT (excluding transport costs)

	Volume	Number	
24M66.1 - Swimming pool water - sent in May 2024 - Refrigerated parcel			
bromoform, chloroform, dibromochloromethane, dichlorobromomethane, trihalomethanes (THMs)	100 mL	2	1
24M66.2 - Swimming pool water - sent in October 2024 - Refrigerated parcel			
bromoform, chloroform, dibromochloromethane, dichlorobromomethane, trihalomethanes (THMs)	100 mL	2	1

PARTICULARITIES

THMs (= trihalomethanes):

sum of the contents of chloroform + bromoform + dichlorobromomethane + dibromochloromethane

Recommended period to start the sample treatment (PRDT):

time interval during which the quality of test materials is optimal (in number of days)

bromoform, chloroform, dibromochloromethane, dichlorobromomethane, trihalomethanes (THMs)	D ₀ +3
---	-------------------

D₀: Day the samples are sent to all the participants (for most proficiency tests, Tuesday)

PROGRAMME 92: BTEX AND VOC IN ATYPICAL AND NON-ATYPICAL NATURAL MINERAL WATERS

Non-atypical mineral waters: flat mineral water with dry residue content at 180°C < 1500 mg/L

Atypical mineral waters: flat mineral waters with dry residue content at 180°C > 1500 mg/L or carbogaseous waters with CO₂ > 250 mg/L

€ 537 excl. VAT - total amount for 2 tests (excluding transport costs)

17 participants in 2023 - EXPERIENCE > 5 YEARS

Need to test another method, evaluate your staff?

Order **additional test samples** (parcel in its entirety): € 135 excl. VAT (excluding transport costs)

Parameters to analyse	Bottle		Number of measurements per parameter and per bottle
	Volume	Number	
24M92.1 - sent in June 2024 - Refrigerated parcel			
Non-atypical mineral water			
BTEX: benzene, toluene, total xylenes, xylene ortho, xylene para + xylene meta, ethylbenzene	60 mL	2	1
VOC: 1,2-dichloroethane, bromoform, chloroform, dibromochloromethane, dichlorobromomethane, tetrachloroethylene, trichloroethylene, trihalomethanes (THMs)*, vinyl chloride	60 mL	2	1
Carbogaseous water (sparkling water)			
BTEX: benzene, toluene, total xylenes, xylene ortho, xylene para + xylene meta, ethylbenzene	60 mL	2	1
VOC: 1,2-dichloroethane, bromoform, chloroform, dibromochloromethane, dichlorobromomethane, tetrachloroethylene, trichloroethylene, trihalomethanes (THMs)*, vinyl chloride	60 mL	2	1
24M92.2 - sent in November 2024 - Refrigerated parcel			
Non-atypical mineral water			
BTEX: benzene, toluene, total xylenes, xylene ortho, xylene para + xylene meta, ethylbenzene	60 mL	2	1
VOC: 1,2-dichloroethane, bromoform, chloroform, dibromochloromethane, dichlorobromomethane, tetrachloroethylene, trichloroethylene, trihalomethanes (THMs)*, vinyl chloride	60 mL	2	1
Highly mineralised mineral water			
BTEX: benzene, toluene, total xylenes, xylene ortho, xylene para + xylene meta, ethylbenzene	60 mL	2	1
VOC: 1,2-dichloroethane, bromoform, chloroform, dibromochloromethane, dichlorobromomethane, tetrachloroethylene, trichloroethylene, trihalomethanes (THMs)*, vinyl chloride	60 mL	2	1

*THM (= trihalomethanes): sum of contents in chloroform + bromoform + dichlorobromomethane + dibromochloromethane.

PARTICULARITIES

The first proficiency test will concern non-atypical mineral waters and carbogaseous waters.
The second proficiency test will concern non-atypical mineral waters and highly mineralised waters.

‘Health approval’: this specific programme provides **concentration levels appropriate for atypical and non-atypical mineral waters.**

Recommended period to start the sample treatment (PRDT):
time interval during which the quality of test materials is optimal (in number of days)

PROGRAMME 4E: VOLATILE ORGANOHALOGENS AND BENZENE DERIVATIVES IN WASTE WATERS

€ 565 excl. VAT - total amount for 1 test (excluding transport costs)

35 participants in 2023 – EXPERIENCE: 25 YEARS

Need to test another method, evaluate your staff?

Order **additional test samples** (parcel in its entirety): € 285 excl. VAT (excluding transport costs)

Parameters to analyse	Bottle		Number of measurements per parameter and per bottle
	Volume	Number	
24M4E.1 - Waste water - sent in January 2024 - Refrigerated parcel			
BTEX: benzene, ethylbenzene, isopropylbenzene, toluene, xylene ortho, xylene para + xylene meta, total xylenes	60 mL	2	1
VOHs: 1,2-dichloroethane, bromoform, chloroform, dibromochloromethane, dichlorobromomethane, tetrachloroethylene, trichloroethylene, vinyl chloride	60 mL	2	1
chlorobenzenes - light: 1,2-dichlorobenzene, 1,3-dichlorobenzene, 1,4-dichlorobenzene, chlorobenzene, dichlorobenzenes (sum of the 3 isomers) chlorotoluenes: 2-chlorotoluene, 3-chlorotoluene, 4-chlorotoluene, chlorotoluenes (sum of the 3 isomers), VOHs: 1,1,1-trichloroethane, 1,1,2,2-tetrachloroethane, 1,1,2-trichloroethane, 1,1-dichloroethane, 1,1-dichloroethylene, 1,2-dichloroethylene (cis+trans), 1,2-dichloroethylene cis, 1,2-dichloroethylene trans, 3-chloroprene (3-chloropropene), carbon tetrachloride, chloroprene, dichloromethane, hexachlorobutadiene, hexachloroethane	100 mL	2	1
hexachlorobutadiene nitro-aromatics: 1-chloro-2-nitrobenzene, 1-chloro-3-nitrobenzene, 1-chloro-4-nitrobenzene, 2-nitrotoluene, nitrobenzene chlorobenzenes: 1,2,4,5-tetrachlorobenzene, tetrachlorobenzenes (sum of the 3 isomers), 1,2,3-trichlorobenzene, 1,2,4-trichlorobenzene, 1,3,5-trichlorobenzene, trichlorobenzenes (sum of the 3 isomers), hexachlorobenzene, pentachlorobenzene	1000 mL	2	1

PARTICULARITIES

For the group of parameter: chlorobenzenes and nitro-aromatics, you will receive a concentrated solution in addition to the bottles of waste water. The analyses have to be carried out with the reconstituted samples.

Other recommended proficiency tests:

🔗 **Programme 4Eb** 'Volatile organohalogenes and benzene derivatives in waste waters at low concentration levels - **'Environmental approval'** (contact us for the concentration ranges).

Recommended period to start the sample treatment (PRDT): time interval during which the quality of test materials is optimal (in number of days)

nitro-aromatics	analyse upon receipt
chlorobenzenes	D ₀ +3
hexachlorobutadiene	D ₀ +3
BTEX VOHs chlorobenzenes - light chlorotoluenes	D ₀ +3

PARTICULARITIES

The number of participants for the proficiency tests in solid matrices is limited. Registrations are possible within the limits of available samples. Register quickly.

Total hydrocarbons index - C10-C40 range: sum of the concentrations of compounds extractable with a hydrocarbon solvent, boiling point between 36 °C and 69 °C, not adsorbed on Florisil and which may be chromatographed by GC-FID, with retention times between those of n-decane (C10H22) and n-tetracontane (C40H82).

Other recommended proficiency test:

↪ **Programme 46** 'Volatile Organic Compounds in solid matrices'

Recommended period to start the sample treatment (PRDT):

time interval during which the quality of test materials is optimal (in number of days)

PCBs, Organochlorines, Organophosphorus, PAHs,
total hydrocarbons index - C10-C40 range, Organotin compounds

PARTICULARITIES

LIMITED QUANTITY

The number of participants for the proficiency tests in solid matrices is limited. Registrations are possible within the limits of available samples. Register quickly.

A.G.L.A.E. provides proficiency tests on the one hand on **raw materials** (to include the part of measurement uncertainty due to the pretreatment phase like in your routine analyses) and on the other hand on **pretreated materials** (to guarantee the presence of all the parameters to analyse and carry out enhanced monitoring on the analytical part of the analysis, predominant source of uncertainty).

- ✓ **Pretreated material:** material dried, crushed and sieved.
- ✓ **Raw material:** material dried, lightly crushed but not sieved. If we are not able to guarantee the presence of all the parameters listed, an evaluation of your results will still be carried out (check of false positives).

Recommended period to start the sample treatment (PRDT): time interval during which the quality of test materials is optimal (in number of days)

LIMITED QUANTITY

The number of participants for the proficiency tests in solid matrices is limited. Registrations are possible within the limits of available samples. Register quickly.

Total hydrocarbons index - C10-C40 range: sum of the concentrations of compounds extractable with a hydrocarbon solvent, boiling point between 36 °C and 69 °C, not adsorbed on Florisil and which may be chromatographed by GC-FID, with retention times between those of n-decane (C10H22) and n-tetracontane (C40H82).

PARTICULARITIES (CONTINUED)

A.G.L.A.E. provides proficiency tests on the one hand on **raw materials** (to include the part of measurement uncertainty due to the pretreatment phase like in your routine analyses) and on the other hand on **pretreated materials** (to guarantee the presence of all the parameters to analyse and carry out enhanced monitoring on the analytical part of the analysis, predominant source of uncertainty).

- ✓ **Pretreated material:** material dried, crushed and sieved.
- ✓ **Raw material:** material dried, lightly crushed but not sieved. If we are not able to guarantee the presence of all the parameters listed, an evaluation of your results will still be carried out (check of false positives).

Other recommended proficiency test:

➔ **Programme 46** 'Volatile Organic Compounds in solid matrices'

PROGRAMME 51: CHEMICAL ANALYSES AND METALS IN WASTE (LEACHING)

Wastes can be polluted soils, ashes, clinkers, residues from industrial activity, sludges from wastewater treatment plants.

€ 616 excl. VAT - total amount for 2 tests (excluding transport costs)

49 participants in 2023 - EXPERIENCE > 20 YEARS

Parameters to analyse <i>(implemented in at least one proficiency test)</i>	Bottle		Number of measurements per parameter and per bottle
	Volume	Number	
24M51.1 - Waste - sent in May 2024			
conductivity, dry matter, dry residue at 105°C of the eluate, pH, soluble fraction, total organic carbon (TOC), unburned rate at 500°C As, Cd, Cr, Cu, Ni, Pb, Zn, Cl ⁻ , F ⁻ , SO ₄ ²⁻	around 125 g	2	1
24M51.2 - Waste - sent in October 2024			
conductivity, dry matter, dry residue at 105°C of the eluate, pH, soluble fraction, total organic carbon (TOC), unburned rate at 500°C As, Ba, Cd, Cr, Cu, Mo, Ni, Pb, Sb, Se, Zn, Cl ⁻ , F ⁻ , SO ₄ ²⁻	around 125 g	2	1

PARTICULARITIES

Technical constraints linked to the supply of contaminated waste have forced us to modify the test design and the parameters provided (Cr⁺⁶ and Hg have been removed). If you have access to contaminated waste, please contact us at contact@association-aglae.fr.

LIMITED QUANTITY

The number of participants for the proficiency tests in solid matrices is limited. Registrations are possible within the limits of available samples. Register quickly.

Leaching of the provided waste to be carried out with a ratio L/S=10 (L/kg) and contact duration of 24h.

Recommended period to start the sample treatment (PRDT):

PROGRAMME 51A: CYANIDES AND PHENOL INDEX IN WASTE (LEACHING)

This programme meets in particular the requirements of the German regulation dealing with waste intended for landfill or recycling ('LAGA/DepV': 'Länder-Arbeitsgemeinschaft Abfall / Deponieverordnung').

€ 605 excl. VAT - total amount for 1 test (excluding transport costs)

20 participants in 2023 - EXPERIENCE > 5 YEARS

Parameters to analyse	Bottle		Number of measurements per parameter and per bottle
	Volume	Number	
24M51A.1 - Waste - sent in September 2024			
Easily liberatable cyanide, total cyanide, dry matter	around 60 g	2	2
Phenol index ^[1] , dry matter	around 70 g	2	2
[1] parameter not covered by accreditation (see general conditions of registration)			

PARTICULARITIES

The number of participants for the proficiency tests in solid matrices is limited. Registrations are possible within the limits of available samples. Register quickly.

The unit to report the results is expressed per liter of eluate.

BIOLOGY AND ECOTOXICOLOGY

PROGRAMME 12: MACROINVERTEBRATES OF RUNNING WATERS

€ 744 excl. VAT - total amount for 1 test (excluding transport costs)

42 participants in 2023 - EXPERIENCE > 10 YEARS

Parameters to analyse	Bottle		Number of measurements per parameter and per bottle
	Volume	Number	
24M12.1 - Habitation of running waters - sent in September 2024			
Faunal list according to NF T90-350 and/or NF T90-388 and, as an option, calculation of IBGN indexes, MCPE12 (Code Sandre 5912) and/or I2M2 (Code Sandre 7613) (no sampling step)	500 mL	12	1

PARTICULARITIES

Fixation reagent: ethanol

Registration deadline: 30 April 2024

Laboratories wishing a second expertise for some singular taxa highlighted during the statistical processing will be able to send them back to AGLAE. To do so, participants will be contacted as soon as the review is issued to specify how to send the concerned taxa back.

This second expertise will allow a better consideration of the profile of singular laboratories for a possible re-ranking of analytical performance.

The test documents of this Proficiency Testing Scheme are not translated into English.

Recommended period to start the sample treatment (PRDT):

time interval during which the quality of test materials is optimal (in number of days)

Faunal list	Analyses will have to be carried out so as to meet the deadline set by AGLAE to send the results.

PROGRAMME 13: ECOTOXICOLOGY

€ 495 excl. VAT - total amount for 2 tests (excluding transport costs)

31 participants in 2023 - EXPERIENCE: 25 YEARS

Need to test another method, evaluate your staff?

Order **additional test samples** (parcel in its entirety): € 125 excl. VAT (excluding transport costs)

Parameters to analyse	Bottle		Number of measurements per parameter and per bottle
	Volume	Number	
24M13.1 - Fresh and waste waters - sent in March 2024 - Refrigerated parcel			
"Daphnia" test: determination of the inhibition of the mobility of <i>Daphnia magna</i> Straus – acute toxicity test	1000 mL	1 for fresh waters and 1 for waste waters	2
24M13.2 - Fresh and waste waters - sent in September 2024 - Refrigerated parcel			
"Daphnia" test: determination of the inhibition of the mobility of <i>Daphnia magna</i> Straus – acute toxicity test	1000 mL	1 for fresh waters and 1 for waste waters	2

PARTICULARITIES

The determination of the inhibitory effect of water samples on the light emission of *Vibrio fischeri* (luminescent bacteria test - "Microtox" ^[1] test) can also be carried out on these samples. Data statistical treatment may be performed if the number of participants' results is sufficient.

^[1] parameter not covered by accreditation (see general conditions of registration)

Recommended period to start the sample treatment (PRDT):
time interval during which the quality of test materials is optimal (in number of days)

"Daphnia" test	D ₀ +2
----------------	-------------------

D₀: Day the samples are sent to all the participants (for the tests of programme 13, Monday)

PROGRAMME 16: BIOLOGICAL DIATOM INDEX

€ 298 excl. VAT - total amount for 1 test (excluding transport costs)

23 participants in 2023 - EXPERIENCE: 10 YEARS

Parameters to analyse	Bottle		Number of measurements per parameter and per bottle
	Volume	Number	
24M16.1 - Running water - sent in October 2024			
Floristic list according to NF T90-354.	around 20 mL	1	1

PARTICULARITIES

Fixation reagent: ethanol.

Registration deadline: 31 May 2024

Transmission of results via Omnidia software: our Biology data processing team will access the data of your laboratory to perform the statistical processing.

Indexes (biological diatom index and pollution-sensitivity index) will be calculated by AGLAE via OMNIDIA software.

Photographic prints of 10 remarkable species will be included in the test report.

Assessment of several technicians is possible: referent results and additional results can be reported.

Recommended period to start the sample treatment (PRDT):

time interval during which the quality of test materials is optimal (in number of days)

Floristic list according to NF T90-354	Analyses will have to be carried out so as to meet the deadline set by AGLAE to send the results.

PROGRAMME 34: PROTOZOANS IN FRESH WATERS

Test materials are suitable for checking analyses in public distribution water and non-atypical natural mineral waters.

€ 655 excl. VAT - total amount for 2 tests (excluding transport costs)

20 participants in 2023 - EXPERIENCE > 15 YEARS

Need to test another method, evaluate your staff?

Order **additional test samples** (parcel in its entirety): € 165 excl. VAT (excluding transport costs)

Parameters to analyse	Bottle		Number of measurements per parameter and per bottle
	Volume	Number	
24M34.1 - Clean water - sent in April 2024 - Refrigerated parcel			
Cryptosporidium oocysts (total) Cryptosporidium oocysts (healthy) Giardia cysts (total) Giardia cysts (healthy)	400 µL	2	1
24M34.2 - Clean water - sent in November 2024 - Refrigerated parcel			
Cryptosporidium oocysts (total) Cryptosporidium oocysts (healthy) Giardia cysts (total) Giardia cysts (healthy)	400 µL	2	1

PARTICULARITIES

With one of the 2 tubes, only one analysis of the total concentrate has to be carried out by I.M.S. reconcentration, staining, identification and enumeration.

The second tube of concentrate will have to be re-suspended in 10 litres of drinking water. A complete analysis will be carried out on this 10-litre sample (complete analysis: filtration, concentration, staining, identification and enumeration).

Recommended period to start the sample treatment (PRDT):

time interval during which the quality of test materials is optimal (in number of days)

Cryptosporidium oocysts, Giardia cysts

D₀+3

D₀: Day the samples are sent to all the participants (for most proficiency tests, Tuesday)

WATER MICROBIOLOGY

PROGRAMME 11: MICROBIAL INDICATORS OF FAECAL CONTAMINATION BY MPN METHOD

Test materials are suitable for the check of analyses in fresh waters, saline and brackish waters and waste waters.

€ 413 excl. VAT - total amount for 4 tests (excluding transport costs)

127 participants in 2023 - EXPERIENCE > 25 YEARS

Need to test another method, evaluate your staff?

Order **additional test samples** (parcel in its entirety): € 55 excl. VAT (excluding transport costs)

Parameters to analyse <i>(implemented in each proficiency test except coliform bacteria)</i>	Bottle		Number of measurements per parameter and per bottle
	Volume	Number	
24M11.1 - Surface water - sent in February 2024 - Refrigerated parcel			
Coliform bacteria, <i>Escherichia coli</i> , Intestinal enterococci	500 mL	2	2
24M11.2 - Bathing freshwater - sent in June 2024 - Refrigerated parcel			
Coliform bacteria, <i>Escherichia coli</i> , Intestinal enterococci	500 mL	2	2
24M11.3 - Sea water - sent in August 2024 - Refrigerated parcel			
<i>Escherichia coli</i> , Intestinal enterococci	500 mL	2	2
24M11.4 - Waste water - sent in November 2024 - Refrigerated parcel			
<i>Escherichia coli</i> , Intestinal enterococci	500 mL	2	2

PARTICULARITIES

Coliform bacteria are provided only in surface water and bathing freshwater.

Coliform bacteria: parameter compatible with (NF EN) ISO 9308-2 and NF T90-413.

***Escherichia coli*:** parameter compatible with (NF EN) ISO 9308-2 and (NF EN) ISO 9308-3.

Intestinal enterococci: parameter compatible with (NF EN) ISO 7899-1 and Enterolert E.

New in 2024:

- Assessment all methods together (z-score and ranking)
- Assessment per methodological group, subject to a sufficient number of results

Recommended period to start the sample treatment (PRDT):

time interval during which the quality of test materials is optimal (in number of days)

Escherichia coli, coliform bacteria, Intestinal enterococci

D₀+1

D₀: Day the samples are sent to all the participants (for most proficiency tests, Tuesday)

PROGRAMME 30: MICROBIOLOGY IN CLEAN WATERS

Test materials are suitable for the check of analyses in public drinking waters, non-atypical natural mineral waters, swimming pool waters, waters for whirlpool baths, waters for multi-jet showers, healthcare waters as well as fresh* waters, waters in health care, pharmaceutical and cosmetic establishments. *Clear fresh waters for the spores of sulfite-reducing anaerobes.

€ 742 excl. VAT - total amount for 4 tests (excluding transport costs)

270 participants in 2023 – EXPERIENCE: 30 YEARS

Need to test another method, evaluate your staff?

Order **additional test samples** (parcel in its entirety): € 95 excl. VAT (excluding transport costs)

Parameters to analyse	Bottle		Number of measurements per parameter and per bottle
	Volume	Number	
24M30.1 - Clean water - sent in March 2024 - Refrigerated parcel			
Culturable micro-organisms at 22°C, Culturable micro-organisms at 36°C	10 mL	2	2
<i>Escherichia coli</i> , coliform bacteria, Intestinal enterococci, spores of sulfite-reducing anaerobes	500 mL	2	2
24M30.2 - Clean water - sent in June 2024 - Refrigerated parcel			
Culturable micro-organisms at 22°C, Culturable micro-organisms at 36°C	10 mL	2	2
<i>Escherichia coli</i> , coliform bacteria, Intestinal enterococci, spores of sulfite-reducing anaerobes	500 mL	2	2
24M30.3 - Clean water - sent in October 2024 - Refrigerated parcel			
Culturable micro-organisms at 22°C, Culturable micro-organisms at 36°C	10 mL	2	2
<i>Escherichia coli</i> , coliform bacteria, Intestinal enterococci, spores of sulfite-reducing anaerobes	500 mL	2	2
24M30.4 - Clean water - sent in December 2024 - Refrigerated parcel			
Culturable micro-organisms at 22°C, Culturable micro-organisms at 36°C	10 mL	2	2
<i>Escherichia coli</i> , coliform bacteria, Intestinal enterococci, spores of sulfite-reducing anaerobes	500 mL	2	2

PARTICULARITIES

Culturable micro-organisms at 22°C and culturable micro-organisms at 36°C: by incorporation.

Coliform bacteria, *Escherichia coli*: parameters compatible with (NF EN) ISO 9308-1 (2000), ISO 9308-1 (2014), ISO 9308-2 (2012) and (NF EN) ISO 9308-2 (2014).

Intestinal enterococci: parameter compatible with (NF EN) ISO 7899-2 and Enterolert DW.

For all the parameters of this programme, uncertainties are calculated and provided to the participants. The indicators are the repeatability uncertainty u_r^2 and the reproducibility uncertainty u_R^2 specific to each participant. The uncertainty evaluated for the whole profession is also presented.

New in 2024:

- Assessment all methods together (z-score and ranking)
- Assessment per methodological group, subject to a sufficient number of results

Other recommended proficiency tests:

- ↳ **Programme 30A** 'Spores of sulfite-reducing anaerobes in fresh waters and waste waters'
- ↳ **Programme 86** 'Indicator germs by filtration in bacteriologically controlled waters' for the analysis of culturable micro-organisms at 22°C and at 36°C after filtration

Recommended period to start the sample treatment (PRDT):

time interval during which the quality of test materials is optimal (in number of days)

Culturable micro-organisms at 22°C,
Culturable micro-organisms at 36°C,
Escherichia coli, coliform bacteria,
Intestinal enterococci,
spores of sulfite-reducing anaerobes

When registering for a scheme any laboratory accepts the following general conditions.

1. Registration for the proficiency tests

AGLAE is a non-profit-association governed by the French 1901 law.

Any analytical or testing laboratory in the chemical, biological, physical... field can register for the tests; it is then a member of the Association.

Any member wishing to participate actively in the operation of the Association may apply (contact us).

AGLAE's proficiency testing scheme is conducted from January to December. It is adapted every year to the needs of laboratories and to French regulation in force. However, registrations are possible all the year through, as long as proficiency tests are still available. Registration for one programme includes the participation in all the tests left when registering. Because regulations vary according to the country, international laboratories are allowed to order proficiency tests as separate units.

AGLAE's service offers are provided as part of a subscription. There is no withdrawal period as samples can deteriorate quickly. Registration is effective when AGLAE sends the registration certificate.

Once registered, a laboratory shall not withdraw and ask for a refund, even if the laboratory requests not to receive the samples.

When registering, the laboratory shall agree to receive the samples any working day (according to French legislation). After registration, participants receive their schedule.

AGLAE might be brought to modify the scheme content during the year (shipment date, change of packaging, analytical periods...).

Without involving AGLAE's liability, any programme might be cancelled if the number of registered participants is considered insufficient or in case of feasibility problem. Should a programme be cancelled, invoiced fees will be reimbursed.

2. Quality Control Materials

AGLAE provides "Quality Control Materials" to any laboratory registered for the current scheme. These materials come from proficiency tests in solid matrices.

Any member may order these materials whether the laboratory has participated or not in the proficiency test from which the test material comes from.

The laboratory can order them at any time during the year, up to a limit of 5 materials from the same batch.

On receipt of a purchase order or of a validated quote, AGLAE informs the laboratory of the date the quality control materials are sent.

The conditions of transport, receipt and payment of quality control materials follow the ones of test materials.

3. Additional test samples

AGLAE provides additional samples for almost all the tests. These samples are sent at the same time as interlaboratory samples, to the same address and no statistical treatment is carried out from them. The laboratory should be registered for the concerned programme to purchase them. The conditions of transport, receipt and payment of additional test samples follow the ones of test materials.

4. Payment of the due amounts

The laboratory has to pay the amount of its invoice. The invoice includes: participation fees, transport and possibly VAT, management fees, discounts.

Invoicing of participation fees is established proportionally to the number of tests left, increased by 10% when the entire set of tests for a programme is no more available or for the purchase of separate units for international laboratories.

Transport costs are not included in the cost of the proficiency tests, they are charged in addition.

Management fees can be applied in particular in case of bank transfer costs to be paid by AGLAE.

Payments have to be done without causing any fees for AGLAE within a fixed schedule specified on the invoice.

Any delay or absence of payment leads to, by right and without formal notice, the immediate payability of the due sums as well as the payment of penalties of one and a half times the legal interest rate, based on unpaid sums and without prejudice of damages and other costs that the Association may require. All sums are due from the deadline of payment until they are actually paid.

AGLAE reserves the right to withhold the access to the Member Area or shipment of test materials to any laboratory not respecting the deadlines of payment and not replying to reminders. In case of temporary suspension of the sending of test materials, the laboratory will not be entitled to claim the refund of the proficiency tests not performed. In case of late payment or payment anomaly, payments will then be requested upon receipt of the quote.

Invoicing is done at the time of registration, independently from the conduct of the tests. It may not be required to be made out once the service has been provided.

5. Accreditation and confidentiality

AGLAE meets the requirements of ISO / IEC 17043 standard and Cofrac rules of application for the provision of interlaboratory comparisons (*Cofrac accreditation No. 1-1664 – scope available on www.cofrac.fr*).

Laboratories cannot use AGLAE's logo jointly with AGLAE's Cofrac accreditation mark.

AGLAE is committed to assuring the **confidentiality of information** it owns. Anonymity of participants in a test is assured by the coding of results, all the test documents containing results are issued with a laboratory code.

AGLAE may not provide a performance assessment for parameters not implemented under accreditation.

6. Communication with the participants

Communication between the Association and participants are mainly in **electronic** format: sending and receiving emails, documents to download from the dedicated area of AGLAE's web site ("Member Area").

Many messages and test documents are translated into English, but the official version remains the French version.

The laboratory is responsible for updating its contact details via the members' area or by e-mail if necessary.

AGLAE accepts no liability for the non-receipt of emails. Laboratories shall follow the conduct of proficiency tests and react to reminders.

7. Transport of test materials

Transport is performed by **express delivery** service by a courier selected by AGLAE.

Delivery of the samples is scheduled the day after the shipment before 1pm for laboratories located in metropolitan France. For other destinations, delivery times depend on the carrier and the location of the laboratory (contact us if need be). Laboratories should be able to receive deliveries from 7.30 am as well as during lunch breaks.

AGLAE's liability towards deliveries is limited to late deliveries of more than 2 working days compared to the delays specified by the courier, not attributable to laboratories and in normal period of activity. The date to which all the parcels are handed over to the courier is considered to calculate possible late deliveries.

AGLAE will not be liable for:

- malfunctioning attributable to the laboratory (no receipt of the parcel handed over by the carrier or loss of the parcel within the laboratory or address change without prior notice),
- delays at customs,
- social conflicts, national or local,
- case of force majeure preventing correct delivery (weather problems...),
- unjustified claim about the integrity of the received products.

In every instance, when AGLAE's liability is involved, the compensation shall be limited to the price for the proficiency test giving rise to such liability (adding the transport fees invoiced).

Attention: depending on the destination, a **custom duty may be requested to the laboratory by the local customs. The laboratory shall take any necessary action to meet the customs' requirements and get the test materials as soon as possible.**

8. Receipt and quality of the test materials

The aim of the PTS preparation is to prepare materials as close as possible to the samples analysed in routine: the contamination levels can therefore be very low or very high.

The preparation and packaging of the test materials are mainly carried out by AGLAE. Subcontracting can be used for some programmes.

In case of major failure found on receipt of the test materials, the laboratory shall contact AGLAE as quickly as possible so that AGLAE can take the appropriate actions. Anomalies notified by the laboratory more than 24 hours after receipt will not be accepted.

The objective aimed during the proficiency testing preparation is to prepare test materials as close as possible to the ones regularly analysed: the contamination levels can thus be very low or on the opposite very high.

In case of major defect of test samples quality, AGLAE has the possibility to cancel the concerned parameter or the whole proficiency test; without the laboratories being able to claim any compensation.

Should a proficiency test be cancelled based on the decision of the Management or of the Administration Board, the test would then be postponed.

In case one or several parameters of a test are cancelled, the concerned parameters will not be systematically provided again, unless otherwise decided by the Administration Board.

9. Analysis of the test materials

The laboratory should start analyses as soon as possible, during the recommended period to start the sample treatment (P.R.D.T.). This period corresponds to the time interval during which the materials' quality is optimal under the recommended preservation conditions. After this period, failures may occur and

interfere with the assessment of the analytical performance of laboratories, without involving AGLAE's liability.

For laboratories outside France, delivery times may be systematically superior to the recommended period to start the sample treatment. Laboratories should check their delivery delay in comparison with the P.R.D.T.

The laboratory shall return results. For almost all tests, results are entered via the Member Area. They must be reported and validated by the deadline defined by AGLAE. Beyond this deadline, results that have not been validated will not be statistically treated. AGLAE will not be liable for that. Should the number of results be insufficient, AGLAE reserves the right to not assess the participants' analytical performance, but comments on the results will be made based on the information in our possession.

The laboratory shall not, in any case, disclose its results to any party (other than AGLAE); anyway before test reports are issued.

10. Test reports

The objective is to issue test reports as soon as possible. The delay varies between 1 and 10 weeks depending on the difficulty met with data processing (number of parameters, deviations between methods). Our average delay to issue test reports is 2.3 weeks. A provisional date is given for each test: however, these dates are not contractual.

Note that test reviews and test reports have to be downloaded from the Member Area of AGLAE's web site. They are available for all the participants registered for the test. If the laboratory wishes to appeal following its performance assessment, it must contact AGLAE's Quality Manager in writing (email or postal mail).

11. Data ownership

Produced data (in particular precision values) belong solely to the Association. They are only aimed at laboratories which participated in the test, for internal use of quality management and check or evidence* of their analytical performance.

Report's reproduction is authorised in its entirety only.

Any use other than those defined above requires preliminary approval from AGLAE under penalty of prosecution; whether it is a usage or communication (full or partial) by laboratories which participated in the test or by third parties.

12. Data protection

AGLAE processes personal data that you provide when registering but also during the proficiency testing scheme in compliance with legal obligations.

For more information with regard to the processing of personal data, you may read the section about personal data on www.association-aglae.fr.

13. Safety policy and respect for the environment

When registering for our tests, laboratories agree to handle samples and dispose of their waste in accordance with the usual caution and current regulations.

Should there be any differences between the French and English versions of this document, the French version shall prevail.
